

Stephanie Grahl
Chief Engineer, MC Squared, LLC

Originally from Atlanta, GA, Stephanie received her Bachelor's and Master's degrees in Civil Engineering from Georgia Tech in 1995 and 1997, respectfully (go Jackets!).

Following graduation, she started her career as a Staff Geotechnical Engineer with Law Engineering in Chesapeake, Virginia. Stephanie gradually worked her way up the eastern U.S. coast seeking out new opportunities with increasing responsibilities as a Project Engineer, Project Manager, Department Manager, and Production Unit Leader with PSI in the metro D.C. area, Whitestone Associates in the Pennsylvania and New Jersey markets, and then with Worley out of the metro Philadelphia office. In 2016, Stephanie came home to help establish the Worley office in Atlanta. In 2019, Stephanie found a new career home with MC Squared in Kennesaw, first as a Project Manager, then Department Manager, and now currently as Chief Engineer.

As Chief Engineer, Stephanie thrives on providing guidance and direction on technical and quality-related matters while helping shape the minds of our future. Stephanie currently resides in Roswell with her husband, two sons, their Staffy and two turtles and spends her free time enjoying yard work and becoming stronger through Pilates and strength training.
